Notification Description (Including Extent, Purpose / Reason, and Effect on Form, Fit and Function)

As part of our ongoing continuous improvement efforts, and to avoid any potential disruption to our supply chain, US Digital has decided to standardize our plastic material. Based on this, the E4T and S4T encoder cover and base will change from PBT (Polybutylene Terephthalate) to PC (polycarbonate).

Additionally, we have made a slight modification to the E4T and S4T cover, reduction in height of a small tab, to allow additional clearance.

Please note: the endplay specification listed on the website has not changed.

OLD

NEW

It is important to note that these changes have no impact to form fit and function of the encoder.
