☐ Material Change  ☐ Specification Change  ☐ Component Change  ☐ Other

Notification Description (Including Extent, Purpose / Reason, and Effect on Form, Fit and Function)

This notice is to inform our customers of a PCB design change that is being implemented for the entire E8T product line.

As part of our continuous improvement objective, the new PCB will improve overall product performance and enhance robustness of this product line. The new PCB has two mounting holes that mate with the base plate instead of one hole and one slot. This change has no impact on form, fit or function for the E8T.

If you have any questions or concerns about this PCN, please contact our Technical Support Group at 360-397-9999 or email support@usdigital.com.
