Notification Description (Including Extent, Purpose / Reason, and Effect on Form, Fit and Function)

As part of our ongoing continuous improvement efforts, US Digital is changing the labeling / marking method for our E3, E6, H3, H6, S1, S2 and S6 products.

The purpose for this change is to create a more durable and longer lasting marking solution as compared to the current label solution. The encoder covers will now have the US Digital logo, part number, and lot code laser marked onto the top surface, as seen below.

Side by side comparison of the current E6 labeling (left) and new E6 laser marking design (right)

Note: These images are of the E6 encoder, the laser marking layout may vary between the product lines listed.
