Notification Description (Including Extent, Purpose / Reason, and Effect on Form, Fit and Function)

As part of our ongoing continuous improvement efforts US Digital is implementing the following changes to our A2 and HD25A product lines.

Description and Extent of Change: We have improved the design by utilizing surface mount devices for the detector and LED, previously these were through hole devices. This change is transparent with the exception of minor cosmetic differences for the A2 kit style encoder, and Spacer Tool used in kit assembly process. The changes are demonstrated in the images below.

Reason for the change: The current detector is at EOL as well as to improve robustness and reliability by utilizing SMT devices.

Effect of Change on Fit, Form, Function, Quality, or Reliability: The changes made have no effect on fit, form or function and both Products continue to meet all published performance parameters. Quality and reliability assessment have been completed with the product qualification meet US Digital’s reliability requirements. A comprehensive qualification report is available upon request.

If you have any questions or concerns about this PCN, please contact US Digital Customer Support at 1-800-736-0194 or email sales@usdigital.com.
