

Product Change Notice

7/24/2022

Products Affected: LS7166A in all its package forms will be discontinued by end of 2022 or when the current stock is exhausted. LS7166A will be replaced with LS7166B in equivalent packages.

Available Date: LS7166B is currently available.

Description of changes: LS7166B is pin-for-pin replacement for LS7166A with exact functionalities and electrical/transient parameters with following differences.

LS7166A	LS7166B
During a READ operation heavy shoot through transient current flows across data-bus buffers.	No shoot through current during READ operation

Reason for Change: Improved performance and elimination of power supply overload with transient over current.
